

5 Tips to Become a Bird Watcher

1. Use binoculars if you have them, these will let you see the structures of birds up close.
2. Stay very still and quiet!
3. Use a notebook to write down your observations:
I notice _____.
I wonder _____.
4. Draw the bird you are watching using the ABCDE's of nature journaling: Accurate, BIG, Colorful, Detailed, and Explained.
5. Experiment watching birds at different times of day (morning, afternoon, evening). Do you see more birds at one time of day? Do you see different birds at different times?

Most importantly, have fun!
